Recruitment for GameDev LLC

Slots City
★★★★★

Introduction: **Project Description** and Objectives

The project is implemented for **GameDev LLC**, a company specializing in online games and gambling platforms.

Project goal:

to find customer support specialists for chat and call channels with various language requirements and experience levels;

to ensure fast and high-quality selection and preparation of candidates.

Client requirements:

Chats/Call Centers without foreign languages:

- no experience required,
- fluent Ukrainian,
- basic computer skills,
- stress resistance.

Chats/Call Centers with French:

- English – B1+,
- French – B1+,
- no experience required.

Chats/Call Centers with English:

- English – B1+,
- no experience required.

VIP Manager:

- 6+ months of experience in call centers/customer service,
- preferably in online sales or VIP support,
- fluent Ukrainian.

Workflow and **Tools Used**

Request Intake and Documentation

During the **initial meeting**, we aligned on

- **hiring goals** and approximate volumes,
- **candidate profiles** for each language group,
- **work schedules**,
- **KPIs**, and other requirements.

These parameters could be adjusted during the process based on GameDev's evolving needs and were approved additionally when needed.

Defining the Ideal Candidate Profile

For each direction, **we defined:**

- required **language proficiency** levels;
- **key soft skills** (stress resistance, politeness, empathy, handling difficult inquiries);
- basic **technical skills** (working with CRM/chat platforms, following scripts);
- typing speed and writing accuracy (for chat roles).

Vacancy Drafting

Separate, appealing **job descriptions** were prepared for each language group – clearly outlining requirements, conditions, shift schedules, and growth opportunities.

Job Posting and Promotion

- **Vacancies** were published across multiple platforms and thematic Telegram channels.
- **On LinkedIn**, we used both manual candidate sourcing and job posting (posts and reposts from the company page).
- We also leveraged our **internal candidate database**.

Selection Criteria and **Screening**

We created an evaluation form with sections for:

language (online test/interview);

technical skills and typing speed for chat roles;

communication and handling objections/conflicts;

motivation and schedule/conditions fit.

Google Meet

Preliminary interviews were conducted via Google Meet with video.

For chat positions, we used **the client's test assignment** (dialogue simulation, inquiry processing, spelling/grammar questions, typing speed test).

We decided who received the test based on **screening results**; the client reviewed completed assignments.

Client Communication

A **shared Google Sheet** (accessible to the SlotCity team) was created with fields for contacts, languages, interview notes, status, and recommendations.

Each time a candidate was added, we notified GameDev's team via **dedicated work chats**, sending resumes and short summaries (strengths, risks, next-step recommendations).

Only **key decisions** (final interviews/offers) were agreed upon with the client; operational steps were managed independently to accelerate the process.

Results

Project duration:

1,5
years

periodic recruitment waves

1-4
weeks

short campaigns lasted

162

Total candidates submitted
(across all chat and call center tracks)

64

Offers made

Breakdown of candidates who **received offers**:

48

Without foreign languages
(Ukrainian-language chats
and call centers)

15

With English
(B1+ and above)

1

With French
(French B1+, English B1+)

Conclusions

The project was implemented on time and consistently throughout the collaboration.

A clear candidate profile, separate vacancies for each language group, a mix of job postings and manual LinkedIn sourcing, and transparent communication through shared spreadsheets and work chats ensured fast and high-quality recruitment.

As a result, **GameDev LLC** consistently received the required number of operators, which improved the speed and quality of customer service.
